

## Technology for 21st Century Skills

Increase the reach and efficiency of your Califone products with these computer peripherals. All are user friendly and those designed for little hands are developmentally appropriate for your youngest students.

### Computer Microphone

The microphone includes a 7' cable for maximum flexibility. Compatible with Macs and PCs.

**AX-12** \$12

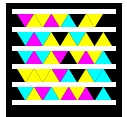

Mac and PC  
compatible

### Desktop Computer Speakers

Sometimes the simple, direct way is the best. Fill the classroom or boardroom with crisp clear sound with this easy-to-use 3-piece speaker solution. Just plug and play. Share multimedia resources, music, podcasts or other resources that include audio with the whole class and see the difference that great audio can make.

**DMS1** \$78

### Multipurpose Laser Presenter

Meet  
the LP3

This is one of the cool tools for teachers or other presenters using interactive whiteboards and projectors. With one-touch graphical function buttons, it can perform all the traditional laser presenter tasks along with several breakthrough new capabilities, such as opening your email program, an Internet Browser, your computer, zooming in/out, and even right- or left-clicking your mouse.

**LP3** \$85

## USB Computer Microscope

Begin hands-on science exploration as soon as you connect the Califone USB microscope to a computer. Engage learners in discovery with variable magnification strengths and light adjustment on the cord. Compatible with Windows® 7.

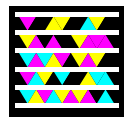

CM1-USB \$189.50

## Audio Splitter

Maximize your student to computer ratio while promoting cooperative learning, language and social skills in the process.

ST \$13.50
