# Diggiditto™ document cameras

Both feature Califone-brand  
innovation and dependability.

Califone helps schools assess student performance and guide instruction by capturing student data with our Smart Document Cameras. Teachers know that integrating visual media increases information retention so they use our high-performing visual solutions to aid their instruction in science, math, fine art, literature and writing.

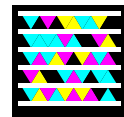

The Diggiditto DC596 document camera assists teachers in personalizing their instruction for differentiated learning. In partnership with GradeCam™, Califone offers a free 6-month trial of specialized software that enables teachers to quickly and effectively assess and record student performance. The GradeCam software instantly enters the data into electronic gradebooks that teachers are already using.

## Diggiditto DC896

This top-of-the-line document camera offers 1.3MP resolution, 12x optical zoom, an extraordinary 8.5" x 11" base light, dual LED lights, brightness & sharpness controls, text and dynamic modes, full remote control, & full AV connections. Diggiditto is Windows® 7 compatible and comes with a fully swiveling camera head.

DC896 \$1,475

With its adjustable mounting stand, the DC596 has a small footprint and uses a USB connection for computer compatibility. You will find all the hardware features you would expect in a leading document camera, but with proprietary software that enables you to use it as a content development tool. Record movies (wmv files), recognize images and link sounds. This allows playback of student- or teacher-created presentations and delivers the ability to Skype™.

DC596 Windows compatible \$675

### DC596 Diggiditto Smart Document Camera

#### Pennsylvania District Encourages Learning through Hands-On Technology Use

With six different departments at the Susquehanna County Career & Technology Center (CTC), Dan McGrath is responsible for maintaining and updating the CTC's technology tools. Looking to replace the CTC's existing document cameras, McGrath purchased Diggiditto Smart Document Cameras for their

flexibility and user-friendly features. Today, they're used to help CTC educators enhance lessons and engage students in school curriculum by displaying real-time presentations, demonstrations and supplemental materials on screen.
