OF EDUCATION

## 7-Port USB Hub

### Model 1117

The 7-port USB hub supports 21<sup>st</sup> Century Classroom applications with fast and easy downloading of instructional materials. The 1117 can be used to download digital content from a computer (Windows or Mac) to up to 7 devices (such as MP3 players) at one time. Its quick transferring of information makes the 1117 an invaluable tool for library media specialists & classroom teachers to implement differentiated or standardized materials for individual or group reading activities, literacy groups, ELD, ESL and other language learning programs.

1. Connects up to five devices with the ports on the front
  2. Connects up to two devices with the ports on the rear
  3. 2.5' USB connecting cord included
  4. Self-powered with external power adapter (not included)
  5. LED indicates successful power connection between the connecting computer and the 7-port USB Hub
  6. Removeable base
- One year warranty for school use - unlike computer peripheral products purchased from consumer electronics stores whose warranties would be voided if used in schools

- Bus-powered operation:
  - Idle current: ~6 mA
  - Operating current: ~250 mA
  - Devices may use up to 1.5 Amps total current
- Self-powered with external power adapter (not included)

Dimensions	3.2" x 1.9" x 0.5"
Weight	4 oz., shipping weight 1 lb.
Warranty	For use in school, church, business and government facilities for 1 year from purchase
Related Product	Califone <u>8101</u> MP3 Player/Recorder

This USB hub is rated to allow for 1.5 amps of current when bus-powered (without an external power adapter). Before connecting any devices to the 1117, ensure that the total maximum current draw of each of the devices added together is less than the current rating of the 1117 and the computer's power supply. Failure to do so can damage the computer, the 1117, and/or any devices connected to the 1117. If you are using a large number of devices or very power-intensive USB devices, an external dc power adapter with a rating of up to 5v/3.5a should be used to provide additional current.
