

THE SIGHTS & SOUNDS
OF EDUCATION

10-Pack USB Headsets

Model 4100-10

The USB Headset is the first headset designed specifically for school use with USB connectivity. Its unidirectional mic and ambient noise-reducing earcups are ideal for high speed internet use and applications such as distance learning, tutorials, language learning and situations requiring isolated vocalized feedback. This 10-pack of headsets is designed for AV carts, literacy groups, computers on wheels and computer labs.

1. Recessed wiring resists prying fingers for school safety
2. Fully adjustable headstrap, earcups and headstrap made with rugged ABS plastic for durability in high-use settings
3. Permanently attached cord with reinforced connection resists accidental pull out for classroom safety
4. 10' straight cord won't tangle with other wires and is lengthy enough to reach rear computer ports
5. Backwards-compatible USB 2.0 plug ideal for high speed internet use, delivers a more balanced sound distribution and eliminates the need for a sound card for "plug and play" performance (meaning Windows and Mac compatibility)
6. Accessible in-line volume and mute control, mic on/off switch
7. Unidirectional electret mic with flexible gooseneck and built-in wind screen reduces recording of unintended sounds
8. Noise-reducing earcup lowers ambient noise so volume does not need to be as high - recommended by the American Speech-Language-Hearing Association for hearing safety
9. Foam-lined storage case
 - One year warranty for school use - unlike headsets purchased at consumer electronics stores whose warranties would be voided if used in schools

"Project Intercept"

Please contact us immediately if you experience any difficulties with your headsets. Our "Project Intercept" customer service program will quickly repair or replace items under warranty. Simply contact us via phone or email warranty@califone.com.
