# WIRELESS HEADPHONE TRANSMITTER

Models **CLS721T, CLS725T, CLS729T**

**Ideal for language learning, literacy groups, ELL / ELD applications and library uses, this wireless VHF transmitter will transmit prerecorded audio content or verbal instructions to an unlimited number of its corresponding color-coded headphones. And with all three available frequencies being able to operate simultaneously in the same room without any interference, three different groups can enjoy wireless learning.**

1. 1/4" audio input from any media source including computers
  - Unlimited number of listeners for each frequency
  - 100' wireless transmission range from transmitter to wireless headphones and headsets
2. 1/4" mic input for transmission of teacher instructions
  - Choice of three (color-coded) VHF/FM frequencies for up to 3 groups of any size to work in the same room simultaneously without distraction or interference from crossover frequencies
  - One year warranty for school use - unlike items purchased from consumer electronics stores whose warranties would be voided if used in schools
