

THE SIGHTS & SOUNDS
OF EDUCATION

Explorer™ Switchable Stereo/Mono Binaural Headphone

Model EH-521

The Explorer raises the bar for an education computer headphone with dependability, quality construction and value. Its dynamic, thin Mylar[®] diaphragm speakers deliver high performance sound for higher quality reproduction of voice and music.

The EH-521 can switch between typical mono functions (ELL / ELD, language labs, speech pathology) and the stereo mode for use with computers, gaming and for music appreciation classes. It's ideal for use in computer labs and libraries with educational software and is Windows and MAC compatible.

Its ambient noise reducing earcups help keep students on task. The steel-reinforced dual headband straps are designed to be equally comfortable for younger students or for use in adult education classes. The headbands have a "memory" feature that no matter how they're bent or twisted, they "remember" their original shape and spring back. The easy-to-clean cushions provide durability and lightweight comfort. Volume control is located on one earcup.

The 1/4" screw-on adapter is included.

1. Rugged plastic headstrap with recessed wiring for safety
2. Steel-reinforced dual headstraps are fully adjustable to fit younger students and adults comfortably
3. Noise-reducing earcups decrease external ambient noise
4. Volume control conveniently located on ear cup
5. Replaceable 6' straight cord, 3.5mm plug, 1/4" adapter
6. Slotted baffles protecting the inner speakers
7. Easy to clean ear cushions
