

THE SIGHTS & SOUNDS  
OF EDUCATION

## PresentationPro™

### Model PA300 Plus

**School audio equipment needs to be rugged and versatile, whether it's needed inside or outdoors, hooked up to a computer, projector, media player, or needed for straight forward voice amplification.**

**The variations are endless and the flexibility built into the PresentationPro makes this PA workhorse a good investment. It's built for fast and easy set-ups so you don't need an engineering degree in order to turn it on and start the presentation.**

**With an increasing number of schools installing projectors and interactive whiteboards into classrooms on a district wide basis, the need has never been clearer to complement these systems with a high-quality speaker that engages students. And with students being involved in so many technology-based activities throughout the year, including posting blogs, creating videos, and podcasting, having a good speaker in the classroom is essential.**

**The PresentationPro provides educators with high-quality audio support, while seamlessly connecting to LCD projectors, interactive whiteboards, multimedia players, DVD/VCRs, and computers for enhanced visual and audio learning. This way the entire class can hear the video or any other digital resource being used.**

**The PresentationPro is powerful enough so a single speaker can be used in each classroom, minimizing installation time and costs.**

**It can be used in classrooms, labs, cafeterias, auditoriums, meeting rooms, hotel & conference rooms, and even outdoor events.**

Comes with MB-350 wall & tripod mounting bracket

Infrared remote for volume / mute is included

Shown with optional TP30 tripod and carrying bag
