

THE SIGHTS & SOUNDS
OF EDUCATION

PowerPro™ with Beltpack Transmitter & Headset Mic

Model PA919M

The PowerPro is the ideal PA for those who need a powerful and easy-to-use, portable sound system. The PowerPro is the first portable PA system to offer wireless transmission to any number of its powered companion speakers. It is a complete self-contained sound system with the capacity to handle up to two wired mics with two wireless mics at the same time. The PowerPro also includes a CD player and cassette player / recorder. It features 90-watts RMS of power, with a single battery-powered unit (AC/DC) unit easily covering crowds up to 1,000 people or more with additional speakers. The PA919M package includes a PowerPro, a wireless M319 Beltpack transmitter and a headset mic.

In addition to the 300' range of wireless transmission to an unlimited number of powered companion speakers, the PowerPro can also daisy-chain two additional units in a conventional wired fashion. Simply connect an XLR cord from the Line out jack to the Line in jack on the companion speakers. The first unit in the chain is the master with each unit still retaining independent volume control. A non-powered PowerPro Support Speaker is connected with a 1/4" Line in. The PowerPro master speaker has two combination XLR / 1/4" jacks for use with wired mics and also includes a set of stereo RCA jacks to connect external audio sources or recording devices.

The PowerPro gives added assurances with visual confirmation of power, radio frequency and audio reception for each of its two wireless receivers through a set of five LED lights on the front of the speaker. Its fiberglass-reinforced polypropylene enclosure has a rugged powder-coated perforated steel grille and telescoping handle. It has a 10" high-powered woofer that's driven by a 40 ounce magnet (the heaviest and most efficient in its class) and a high-frequency compression driver for optimal audio reproduction. The PowerPro also has independent bass and treble controls, digital master volume control, power status indicator.

1. Green, red and amber LED lights (front) for each wireless mic receiver give visual confirmation of power, signal & reception
2. 4-position steel handle for easy mobility
3. Dual 16-channel wireless mic receivers
4. Programmable CD player
5. Cassette player/recorder with variable speed playback
6. Separate volume, bass, treble controls
7. Aux in and line inputs to connect with other media players
8. Beefy 3.5" go-anywhere wheels rests on solid steel axles
9. 16-channel UHF transmitter to powered companion speakers
10. Steel skid guards for protection & durability
11. Two dual purpose XLR/1/4" mic inputs, each with volume control
12. Wireless transmitter & headset mic
 - Includes volume / mute remote control (not shown)
