PowerPro™ SD Portable PA with Handheld Wireless Mic

Model PA919SDM

The PowerPro SD is the ideal PA for those who need a powerful and easy-to-use portable sound system. It is the first portable PA system to offer wireless transmission to any number of its powered companion speakers. The PowerPro SD is a complete self-contained sound system with the capacity to handle up to two wired mics with two wireless mics at the same time. Full digital capability plays and records from and to its built-in SD card slot and a USB 2.0 port. It's ideal for on the go presentations in schools, hotels, police & emergency response situations, houses of worship uses and by rental and convention facilities. It features 90-watts RMS of power, with single a battery-powered unit (AC/DC) unit easily covering crowds up to 1,000 people or more with additional speakers. The PA919SDM package includes a PowerPro SD and a wireless beltpack transmitter (M319) with a headset mic.

In addition to the 300' range of wireless transmission to an unlimited number of powered companion speakers, the PowerPro can also daisy-chain two additional units in a conventional wired fashion. Simply connect an XLR cord from the Line out jack to the Line in jack on the companion speakers. The first unit in the chain is the master with each unit still retaining independent volume control. A non-powered PowerPro Support Speaker is connected with a 1/4" Line in. The PowerPro master speaker has two combination XLR / 1/4" jacks for use with wired mics and also includes a set of stereo RCA jacks to connect external audio sources or recording devices.

The PowerPro SD gives added assurances with visual confirmation of power, radio frequency and audio reception for each of its two wireless receivers through a set of five LED lights on the front of the speaker. Its fiberglass reinforced polypropylene enclosure has a rugged powdercoated perforated steel grille and telescoping handle. It has a 10" high-powered woofer that's driven by a 40 ounce magnet (the heaviest and most efficient in its class) and a high-frequency compression driver for optimal audio reproduction. The PowerPro SD also has independent bass and treble controls, digital master volume control, power status indicator.

1. Green, red and amber LED lights on front for each wireless mic receiver give visual confirmation of power, signal & reception
2. 4-position steel handle
3. 2 16-channel wireless mic receivers
4. Programmable CD player
5. MP3 player/recorder controls with dedicated remote
6. Volume, bass, treble controls
7. Aux in and line inputs to connect with other media players
8. Beefy 3.5" go-anywhere wheels
9. 16-channel UHF transmitter to powered companion speakers
10. Steel skid guards for protection
11. Two dual purpose XLR/1/4" mic inputs, each with volume control
12. Wireless transmitter & headset mic
• Includes volume / mute remote control (not shown)
