

WIRELESS HEADPHONE TRANSMITTER

Models CLS721T, CLS725T, CLS729T, CLS747T

1. 1/4" audio input from any media source including computers
 - Unlimited number of listeners for each frequency
 - 100' wireless transmission range from transmitter to wireless headphones and headsets
2. 1/4" mic input for transmission of teacher instructions
 - Choice of four (color-coded) VHF/FM frequencies for up to 4 groups of any size to work in the same room simultaneously without distraction or interference from crossover frequencies
 - One year warranty for school use - unlike items purchased from consumer electronics stores whose warranties would be voided if used in schools

Choice of four available transmitting frequencies

Ideal for language learning, literacy groups, ELL / ELD applications and library uses, this wireless VHF transmitter will transmit materials to its corresponding color-coded headphones or headsets. And with all four available system frequencies being able to operate simultaneously in the same room without any interference, four different groups can enjoy wireless learning.
