

PowerPro

PA-916

PRODUCT OVERVIEW

Powerful Sound Presentation Solutions™

The **Califone® PowerPro** is the ideal system for those who require an easy-to-use, portable sound reinforcement solution but do not have the budget, technical know-how or time required to operate a multi-component system. Designed for any kind of venue, the PowerPro is the first portable PA system to offer wireless transmission to any number of its powered companion speakers, meaning it has unlimited expandability to handle any situation.

PowerPro is a complete self-contained sound system with two built-in wireless mic receivers, a CD player, a variable speed cassette recorder/player and features 90-watts RMS of power with a single unit easily covering crowds up to 1000 people. This Wireless PowerPro package can support crowds of 2000 people or more with added PowerPro Wireless Companion speakers.

In addition to the 300' range of wireless transmission to its powered companion speaker, the PowerPro also has an active bus circuit that can be used to connect two additional units in a conventional wired fashion. Simply connect an XLR cord from the Line out jack to the Line in jack on the companion speakers. The first unit in the chain is the master with each unit still retaining independent volume control. The non-powered PowerPro Support Speaker is connected with a 1/4" Line in.

The PowerPro master speaker has two combination XLR / 1/4" jacks for use with wired mics and also includes a set of stereo RCA jacks that are ideal for connecting external audio sources or recording devices. Its fiberglass-reinforced polypropylene enclosure has a rugged powder-coated perforated steel grille and telescoping handle for easy transporting.

The PowerPro gives added assurances with visual confirmation of power, radio frequency and audio reception for each of its two wireless receivers through a set of five LED lights on the front of the speaker. Its 10" high-powered woofer is driven by a 40 ounce magnet (the heaviest and most efficient in its class) and a high-frequency compression driver for optimal audio reproduction. The PowerPro also has independent bass and treble controls, digital master volume control, power status indicator, a universal power supply and is C-UL and CE approved safe for use in schools, by rental facilities and other venues.

- Up to 300' wireless transmission to unlimited number of powered wireless companion speakers
- 90 Watt RMS power amplifier
- Two built-in 16-channel selectable UHF wireless mic receivers
- Operates on both AC and DC power for flexibility at all types of indoor and outdoor venues
- Built-in fully programmable CD, variable speed cassette player (plays CD-R & CD-RW discs)
- All-terrain wheels and 4-position telescoping handle for easy transporting

A P P L I C A T I O N S

Its portable size, easy setup, reliability and simple-to-operate control panel make the PowerPro ideal for a wide variety of sound reinforcement applications.

Educational Institutions - A practical solution ensuring students can hear vocal and prerecorded presentations in assemblies, athletic functions, theatre events and many more applications.

Government Facilities, Hospitals & Law Enforcement - Require the safety and certification the PowerPro delivers. AC/DC powered capabilities meet emergency response requirements and the portability and versatility of the PowerPro make it a go anywhere sound solution.

Meetings (Lecture Halls, Presentations, Conferences, Civic Organization Meetings, etc.) ideal for everything from an impromptu press conference to the local civic organization meeting. With its built-in cassette deck, users can record speeches or other program/performance material.

Athletic Events from practices to game-day the PowerPro is perfect for announcements, Parks & Recreation Departments and leading cheers. The 300' wireless transmission range of the PowerPro to any number of its powered companion speakers make for a custom tailored sound reinforcement solution which easily covers a football field as well as baseball and soccer games, Dance & Fitness events, races, parades and so much more.

A/V Multimedia Support - in the classroom, the boardroom or any sales presentation, the PowerPro delivers clear sound, vocally and via the built-in cassette and CD Player. With RCA inputs users can augment program material with audio from external cassette and CD players, VCR and DVD players, television and multimedia computer presentations.

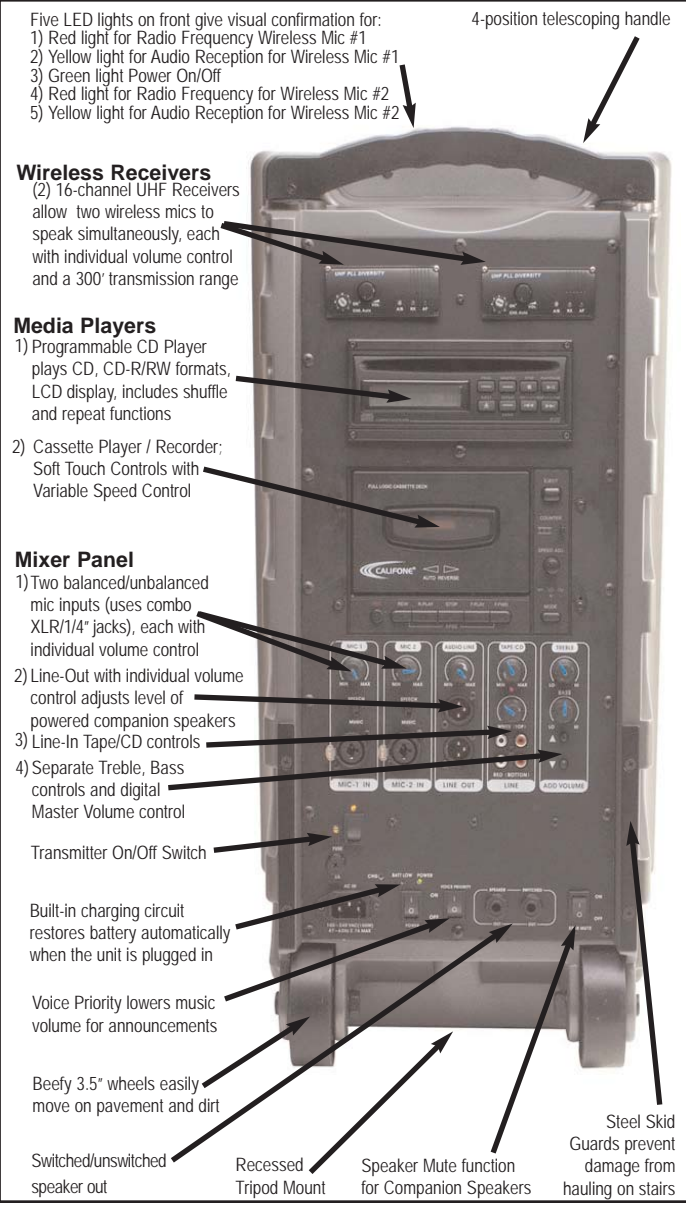

Rental Inventories - The PowerPro is the perfect reliable solution for rental houses and single event users who do not want to invest in either the equipment or the time to learn the gear.

Houses of Worship - Ideal for services, social functions, internment ceremonies and other large indoor or outdoor events.
